Be part of something bigger than a team experience.

Be part of changing lives.

Currently 16% of the world's population is living with disability. Thanks to research and improved care during pregnancy and in the newborn period, the rate of cerebral palsy (CP) in Australia has fallen to around 1 in 700 births, meaning around one baby is born with CP every 20 hours.

CP is a permanent life-long condition caused by damage to the developing brain. It is the most common physical disability in childhood, there is no pre-birth test and there is no known cure.

We rely on the generosity of our donors and corporate partners to fund events like the Krazy Kosci Klimb, to turn dreams into reality.
